SPIRO  **TECH**
FOR BETTER PERFORMANCE

From SpiroTrap MB2 or MB3 to Flush Connector... in two twists.

Introducing the quick and easy to use connection tool, that's perfect for engineers when flushing a domestic heating system. The flush connector takes full advantage of the unique twist-release mechanism, first pioneered on the SpiroTrap MB2 (and now the MB3) and allows you to power flush in a flash.

There's no need to dismantle the pump or fix connections to radiators or other parts of the system. Simply unscrew the SpiroTrap MB2 or MB3, screw on the Spirotech flush connector and you're ready to go.

Features & Benefits:

- **Quick and easy - fitted in seconds.**
- **Made from robust brass.**
- **Compatible with all good Power flush units.**
- **Perfect for use with the SpiroPlus range.**
- **20 Year SpiroLife Guarantee*.**

Perfect for use with
SPIROPLUS®

*Terms and conditions apply. Based on the service life of a system, with a maximum period of 20 years.
